PROJECTS

Admin Dashboard

A single-page web app built using MERN stack, MUI, and Nivo, featuring dark and light modes. Admin users can view daily and monthly sales, sales breakdown by category, customer distribution by country on an interactive world map, products by category, and export transactions to CSV files.

Style Point

Style Point is a stylish ecommerce store for clothing. Its frontend is built with React, styled components, and MUI, while Stripe ensures secure payment processing. Customers can browse and filter products, add to cart, and checkout with ease. All data is securely stored on a MongoDB database.

Portfolio and Resume

This resume and the portfolio website are built using React and Tailwind CSS. The web app is fully responsive and features an easy to navigate design. The projects section showcases my work, highlighting the technologies used for each project, live previews, and access to the source code.

SKILLS

HTML · CSS · JavaScript · Node.js · React · Express.js · MongoDB

Redux · Tailwind CSS · MUI · Apps Script · Git · Firebase · styled-components

EDUCATION

2018 - 2020
Humber College

Computer Programming Diploma

Developed strong foundation in programming fundamentals. Relevant coursework: Web Programming and Design, and Framework Programming

Current
Udemy

Advanced Web Developer Bootcamp

Expanding skills in cutting-edge web development technologies, including React, Node.js, Express, MongoDB, and mastering advanced concepts.

EXPERIENCE

2019 - 2020
Humber College

Senior Peer Mentor

Built a comprehensive interaction logging system using Google Apps Script, led workshops, organized events, won Senior Peer Mentor of the Year award.
